Cerenade FormsServer application hosts and serves WYSIWYG, Pixel-perfect, Secure HTML forms on the web.

ZERO FILLER - Cerenade WYSIWYG, High Definition HTML forms require no software installation on the client machine. FormsServer cuts across platform, browser and installation limitations by offering feature-rich, WYSIWYG, scalable, pixel-perfect, High Definition forms that run on any hardware and Operating System.

INTELLIGENT FORMS - Supports validation, calculation, text Auto-formatting and dynamic/scrollable table functionality built into forms.

DYNAMIC BARCODING - Barcode objects are dynamically updated to reflect changes in the form. Barcode support covers PDF417, PostNet and many others.

SECURITY - Authenticates individual users, encrypts data, ensures secure data transmission, and validates digital signatures.

DOCUMENT MANAGEMENT CONNECTIVITY - Generates meta data files, converts forms to TIFF, PDF or FAR and forwards the result to popular Document Management Systems. Native support for Laserfiche is available.

eAPPLICATION - Runs WYSIWYG, high-definition, scalable wizard-based eApplications created with Cerenade Designer.

XML CONNECTOR - Extracts and saves XML data of forms to external databases.

LASERFICHE CONNECTIVITY - Populates Laserfiche templates with data of forms, and stores templates of forms in TIFF, PDF or FAR.

MEETING STANDARDS -

- Meets the requirements of the Section 508 of the Rehabilitation Act.
- Certified by U.S. Department of State ITCCB CR 1-04044.
- Meets the C&A of OMB Circular A-130 and NIST Special Publication 800-37.
- Conform to e-authentication policy standards of OMB and NIST.
